Subject Index

Acaulospora spp. 272
Accelerated degradation 279
Acetate 195
Acetylene reduction activity 100, 177
Acetylene reduction assay (ARA) 73
Acid and neutral phosphatase 189
Activation of nitrification 165
C additions 265
Aerobic degradation 279
Agroecological rotation 10
Alfalfa 141, 195
Aliette 141
Aliphatic acids 165
Altitudes 272
Amino acids 261
Ammonification 147
Ammonium 261
Antagonism 33
Aphelenchoides spp. 5
Aporrectodea caliginosa 217
Aporrectodea longa 209
Apparent activation energy 127
Apprectodea trapezoides 285
ARA 100
Arctic rhizobia 161
Aromatic acids 165
Assimilation efficiency 202
N availability methods 89
Available P 189
Azospirillum 100

Bacterial counts 154
Beech forest 253
Biocontrol 95
Biological activity 122
Biomass C 55
Biomass N 55
Biomass P 55
Bipolaris sorokiniana 46
Bradyrhizobium 107
Bradyrhizobium japonicum 141
Brassica napus 213
Breton plots 46
Butyrate 195

Cadmium 117
Calcite 131
Cell decomposition 290
Cellulose 137
Change with time 60
Chrome azurol S reagent 39
Clover 189
Coal waste 131
Collembola 233
Colonization 141
Common root rot 46
Competition 107, 161
Competitiveness 170
Coniferous forest 233
N conservation 228
Consumption 202
P content 189
Conventional farming 147
Copper 117
Cornus florida 241
Crop residues 182
Crop rotation 46

Damping-off 95
Decomposition 137, 202, 241
Dehydrogenase activity 265
Denitrification 1, 19
Detrital food webs 67
Fe dissolution 39
Dissolved CH_4 concentration 28
Disturbance 272
Dry tropical forest 55

Earthworm 209
Earthworms 137, 285
Ecumenicus spp. 5
Effective cowpea rhizobia 112
Eisenia andrei 117, 137
Endogeic earthworms 217
Enterobacter 95
Environmental stress 170
CO_2 evolution 1

Ferrallitic soil 182
N fertilisation 265
Fertilization 28
Fertilization experiment 81
Field method 122
Flooded soil 279
Fluorescence antibody microscopy 147
Fly ash 199
Forest soil 177
Fungal biomass 233
Fungal grazing 233
Fungicide 141

Gaeumannomyces graminis 33
Garden refuse 137
Gas chromatographic analysis 1
Gigaspora spp. 272
Gliocladium 95
Glomus aggregatum 112
Glomus pallidum 112
Glomus spp. 272
Glucose 195
Growth 117

Heavy metals 5
Herbage 189
Heterodera spp. 5
Hexachlorocyclohexane 279
Hordeum vulgare 10, 46

N immobilization 154, 228
Indigenous 107
Inoculated 107
Inoculation 170
Integrated farming 147
^{15}N-isotope dilution 100

Knallgas bacteria 127

Legume 177
Legumes 73
Lettuce 95
Lignite 131
Lime 253
Litter 241
Litterbag 253
Litterbags 241

Live weight 209
Low-temperature adaptation 161
Lumbicidae 217
Lumbricus rubellus 137
Lumbricus terrestris 202

Manure 19
Medicago sativa 141
Mesofauna 253
Methane flux 28
Methane oxidation 28
Methane production 28
Microarthropods 241
Microbial activity 1, 233
Microbial biomass 10, 19, 55, 154, 228, 253
Microbial biomass C 265
Microbial biomass N 265
Microbial population 272
Microbivores 67
Microscolex dubius 285
Microtopography 60
Mine spoils 131
Mineral fertilizer 213
Mineral nitrogen 100
N mineralization 165, 199, 228
Moder 253
Mucus excretion 217
Multiply cropped paddy fields 213
Mycotrophy 272

^{15}N 10, 241
Nematodes 5, 67
Nitrate 261
Nitrification 1, 19, 147
Nitrification inhibition 165
Nitrobacter spp. 147
Nitrogen 81, 182, 241
Nitrogen assimilation 261
Nitrogen fixation 100, 177
Nitrogen mineralization 89
Nitrogenase activity 177
Nodulation 73, 107
Non-flooded soil 279
Nutrient concentrations 60
Nutritional ecology 202

Occurrence 131
Octolasion lacteum 217
pH optimum 127
Organic manure 213
Organic soil 290
Oryza sativa 213
Oxygen tension 100

Particle-size fractionation 182
Pentachlorophenol (PCP) 117
Phaseolus vulgaris 170
Phospholipids 19
Phosphorus fertilizer 177
Phytoalexins 170
Pig manure 89
Pinus nigra 233
Population dynamics 285
Porosity 221
Pot experiment 10
Poultry manure 89

Pratylenchus spp. 5
Predator-prey 221
Propionate 195
Propylene oxide fumigation 290
Protozoan population 221
Pyrolysis-field ionization mass spectrometry 81

Quercus prinus 241

N recovery 228
Co-recycling of wastes 199
Mn reduction 33
N_2O release 1
CO_2-release 122
Revegetation 131
Rhizobia 73, 141
Rhizobium 107
Rhizobium leguminosarum bv. *phaseoli* 170
Rhizosphere 100, 141, 154
Rhizosphere bacteria 33, 39
Rice fields 28
Rice rhizosphere 279
Roots 189
Rotation effects 10
Ryegrass 189

Sainfoin (*Onobrychis*) 161
Salt stress 73
Savannas 67
Sclerocystis microcarpa 112
Seasonal change 127
Seasonal changes 55
Co-selection 112
Sewage sludge 5, 199
Sexual development 117
Siderophores 39
Silica gel 19
Soil atmosphere 1
Soil cores 28
Soil cultivation 285
Soil enzyme activity 233
Soil hydrogenase 127
Soil management problems 213
Soil microorganisms 261
Soil nitrogen 10
Soil organic matter 81
Soil organic N 154
Soil particle-size fractions 81
Soil respiration 122, 221, 265
Soil sterilization 112
Soil structure 221
Soil water potential 209
Solanum tuberosum L. 265
Sterilization 290
Sublethal effects 117
Substrate-induced respiration 233, 265
Supercooled unfrozen soil 195
Sustainable agriculture 213
Symbiotic effectiveness 161
Symbiotic nitrogen fixation 73

Temperature optimum 127
Testate amoebae 290
Texture 60
Tomocerus minor 233
Trichoderma 95
Triticum sativa 213
Tropical soil 170
C turnover 217
Typic Cryoboroll 221, 228

Ulex gallii 177
O_2 uptake 1
Fe uptake 39
Urea 182
Urease production 261

VAM 46
Vegetation recovery 60
Vesicular arbuscular mycorrhizae 112
Vesicular-arbuscular mycorrhizae 131, 272
Vigna unguiculata 112
Volcanic substrates 60

Wheat 33

Yield 189
